Preparing to Take Your Written Multiple-Choice Exam

Studying the publications assigned is one way to improve your chances of ultimately being the top competitor. There are many different approaches that one can take to studying. An excellent way to prepare for this type of exam is to read each publication twice. First, read it straight through so that you understand the general focus as a whole. Next, reread the publication, making notes and highlighting the most important points that you see in each section. Other strategies are to use acronyms for remembering information or to form a study group and quiz one another. In the end, the choice is personal.

Here are some additional study tips for a written multiple-choice exam:

1. **Minimize environmental distractions.** Try to limit the amount of distractions in your environment when studying. Distractions include, but are not limited to, email, cell phones, and even other people. Eliminating distractions will make it easier for you to concentrate and retain the information you are studying.
2. **Avoid burning the midnight oil.** Retaining information is difficult for many people when they are tired. If possible, try to study when you are well rested and ready to concentrate.
3. **Review chapter overviews or summaries.** Chapter overviews and summaries typically provide information on the most important points in a chapter. Oftentimes, reviewing these areas before reading a chapter helps you determine and understand the important topics in the chapter. After reading the chapter, you can use overviews and summaries to test yourself on critical knowledge from the chapter.
4. **Quiz yourself.** After you read a chapter or section, quiz yourself on important topics, definitions, etc. You can also use headings and specific terms to develop questions prior to reading the material. Afterwards, while reading the section or chapter, you can try to answer those questions.
5. **Have someone quiz you.** After you read a text, a great way to see if you have retained information is to have someone ask you questions regarding the material you just read.
6. **Avoid cramming.** Spreading your studying out over time will help you concentrate and retain the information you read.
7. **Look up words or phrases you don't know.** Have a computer or dictionary available when studying so that you are able to look up words and phrases that you aren't familiar with.
8. **Mark it up.** Highlight and/or underline important sections of the text while you study. Marking up the text will help you concentrate on important topics and also make it easier to review the material again later.
9. **Take notes.** Taking notes of the important topics you read in the text can be an efficient study aid to help you remember what you read.

Exam Taking Tips

The multiple-choice written exam questions have four (4) answer choices. To get the highest score, always select the best choice listed, even if more than one answer option seems plausible to you. Be sure to read all answers before choosing. Don't focus on a choice that is not provided. Don't get distracted by thinking of other possible responses that are not among the choices presented. Don't get stuck on the idea that you want to combine two responses. Demonstrate your judgment by picking the one answer that, by itself, is better than any other answer, by itself.

Prepare yourself physically for this exam as you would prepare yourself for any special assignment that requires concentration. Unusual preparation may cause you problems. Eat and

drink beverages as you usually would. For example, consuming more caffeine than usual can make you jittery; less than usual can leave you listless. Get the amount of sleep that leaves you most alert. Bring whatever personal items you need, such as eyeglasses or tissues.

Here are some additional tips to help you during the book-referenced exam. These simple procedures help you avoid marking the wrong answer when you know the right one.

- 1. Listen to the instructions.** Before you begin the exam, it is important that you read and/or listen to all instructions carefully. Ensure you know how to correctly fill out the answer sheet.
- 2. Get familiar with your exam.** When you begin the multiple-choice written exam, glance through it to acquaint yourself with the task ahead of you. You do not have to go through the questions in the order you find them.
- 3. Check the time.** Check your watch periodically throughout the exam so that you know how much time you have remaining.
- 4. Don't spend too much time on one question.** If you have a difficult time with a question, go on and come back to that question later. Do make a note to come back to it, though. You may come back with a fresh approach, and a question you had trouble with earlier may seem easy.
- 5. Read thoroughly.** Read every question carefully before you attempt to answer it. This advice may sound too simple, but it is important. The major reason people miss questions when they know the material is that they do not read the question completely.
- 6. Circle or underline key words.** When reading a question, circle or underline key words that are important to the question stem. This approach will both help you focus on the critical aspects of what is being asked, as well as help you remember the important aspects of the question if you need to skip it and return to it later in the exam session.
- 7. Break a sentence up if you don't understand it.** Sometimes, sentences in a question stem can be long. If you don't understand the sentence, use slash marks to break it into smaller sections to better understand the sentence.
- 8. Read all of the answers before choosing one.** The most common answer people choose is **a**, whether it is right or not. The reason is that they think the first answer looks plausible, so they stop reading. Don't make the mistake of not reading all of the answers before making a selection. Even if **a** looks like a really good answer, one of the other answers may be better. When you read the alternatives, you may think of something you had missed at first.

9. **Use process of elimination.** If you aren't sure of the correct answer, use process of elimination. Eliminate answer choices that you know are definitely wrong. Then focus on selecting the best answer from the choices remaining.
10. **Do not read something into the question that is not there.** When reading a situational question, assume that everything is normal, unless the question tells you differently. When something is amiss, the question will tell you. Stick to the facts of the questions.
11. **Answer every question.** There is no penalty for guessing. Even if you don't know the correct answer, you have one chance in four of choosing the right one. If you can eliminate one or two of the alternatives, your chances are even better.
12. **Fill out your answer sheet correctly.** In marking the answer sheet, be sure to fill in the blank that corresponds to the answer you have chosen. If you skip a question, make sure you skip to the right space on the answer sheet. If you mark the wrong answer and want to change it, erase your first mark completely. Remember to mark only *one* answer for each question.
13. **Use your time wisely.** If you finish early, use the remaining time to answer questions you skipped, re-evaluate questions you were unsure of, and check to ensure that you filled out your answer sheet correctly.

When taking your exam, don't compromise your chances of success by trying to follow exam-taking tips you may find online. Many of these tips are just bad advice and could cost you points. Use the following statements to exam your assumptions.

True or False?

True	False	
_____	_____	1. If you don't know the answer to an exam question, take a guess. <i>True! Guessing is not penalized, and you just might choose the right answer.</i>
_____	_____	2. Choose the longest answer option. <i>False! This kind of general pattern strategy is a very poor approach to take on a modern exam. Answer choice length is not an indication of an incorrect or correct response.</i>
_____	_____	3. Choose the answer option that seems most logical to you. <i>True! Rely on your knowledge of the assigned publications to think critically and logically when answering a question.</i>

4. Choose the answer with a middle value when other options are higher or lower.

False! This is another piece of bad advice you might come across somewhere. No such pattern is present on Ergometrics' exams.

5. More often than not, the correct answer is B or C.

False! Once again, this is poor advice. Using general pattern strategy is not the way to pass a modern exam. There is no pattern to Ergometrics' correct answers. Answer questions by content, not by old, incorrect advice or superstitions.
